

SPRING/SUMMER 24 MEN'S COLLECTION

GIARDINO ITALIANO

The passion of handmade that makes Italy unique in the world. Italian craftsmanship and the excellent quality are the protagonists of the collection.

Villa Necchi, a historic Milanese location linked to the Tod's brand, frames the presentation with a traditional Italian garden, where the classics of the men's spring-summer '24 collection are reinterpreted with an essential touch. The casual tailoring is even more relaxed, in warm tones of brown and ecru made from high quality materials, from the most precious and light leathers to impalpable suede, which have always defined the Tod's Italian lifestyle.

A triangular leather pattern becomes a recognisable symbol on the jackets, which can be found on the **Field Jacket** in structured cotton and on the nylon and fabric bomber jackets that ensure a timeless style, for a look that is both refined and relaxed at the same time. The most traditional garments of the Italian wardrobe, the short and light cabans and the anorak windbreakers design a man who never gives up elegance and quality.

The belt is not a complement, but a supporting element: two models, the **Greca Belt** in rope and without buckle as a symbol of contemporary menswear wardrobe and the woven leather version with the **T Timeless** buckle, Tod's iconic symbol that recurs throughout the collection.

Tradition and innovation shown in the **Bubble Gommino** and the iconic **Gommino** are undisputed protagonists, they combine the classic tradition of the driving shoe with a modern style. The new formal style is increasingly attractive for the new generations. Italian know-how meets continuous experimentation in colours and accessories.

The **moccasin** with its leather bottom and curled toe emphasises the leather handmade construction process typical of the Italian craftsmanship that characterises the Tod's DNA.

The **Tab Sneakers** evolve with combinations of the artisanal work and finest materials: doubled linen and refined leathers build unusual combinations.

The linen, the noble summer material, is applied to the sneakers, creating styles which have a proper urban function.

The now iconic **Tod's Riviera Slip-on**, undisputed symbol of the Italian lifestyle, is presented in a new version with tassels.

Bags, like belts, are the foundation of each look. The iconic **Di Bag** in ultra-soft leather, now in a men's version, is presented in different models: from the portfolio, hand or shoulder bag to the weekender, essential elements for the contemporary man.

The **Trek backpack** returns as a focus of the Tod's lifestyle, in a more urban and luxurious version, in nylon with leather details or in soft leather or suede.
