

**MEN'S COLLECTION AUTUMN - WINTER 2024/25**

## **MATERIA**

*In this collection, Tod's presents the **PASHMY** project: the research for the most exclusive and precious materials and the craftsmanship know-how of companies which represent the Italian quality. The Pashmy project expresses the highest level of exclusive materials, which is the symbol of Tod's craftsmanship tradition.*

The **Pashmy bomber**, with its linear lines, features a water repellent and stain-resistant treatment, making it an iconic staple of the male wardrobe. The color palette consists of warm tones of chestnut and écru and cool tones of ice and teal.

The iconic Tod's **W.G.** boot is inspired by the "aviator" world, in suede and with sheepskin lining. The boot also comes in a new version influenced by the world of après ski, in leather trimmed sheepskin.

The **Bubble Gommino** is presented in long fur, precious crocodile or in a new cashmere-soft leather, echoing the texture of the clothing. A wide range of brushed versions is also available in natural tones.

The new **urban sneakers** take inspiration from saddle stitching, craftsmanship and precious materials codes, giving this style a precise urban message, which combines sporty design with excellent materials.

The bag collection showcases the iconic **Di Bag**, in multiple versions: sheepskin or textured leather. It is also available in a more formal version, in tan or in black.
